OFFICIAL DIGITAL STUDY GUIDE VERIFICATION

Format: High-Yield Digital PDF | Standard Price: Rs. 49

Authorized License: Personal Single-User Academic License

STUDY GUIDE DETAILS & CONTENTS:

Comprehensive high-yield notes designed for Bachelor of Physiotherapy (BPT), MBBS, BDS, and allied healthcare students. Covers fundamental anatomy, clinical assessments, pathological conditions, evidence-based physical therapy rehabilitation protocols, and exam-oriented high-yield review.

KEY HIGHLIGHTS:

- Exam-Focused: Concise points curated from leading medical textbooks and clinical references.
- Visual Diagrams: High-yield diagrams and tables for quick revision.
- Mobile & Tablet Optimized: Readable on phones, tablets, iPads, and laptops.
- Official Medicos Minds Release: Verified by Dr. MD Kamran Alam.

REHABILITATION

Page - 1

:: INDEX ::

UNIT - I : CONCEPTUAL FRAMEWORK OF REHABILITATION

1. Conceptual Framework of Rehabilitation :-
   - Meaning & concept
   - Basic principles
   - Goals / Objectives
   - Role of rehabilitation in disability
2. Rehabilitation Team :-
   - Definition
   - Members
   - Roles & responsibilities
   - Team approach
3. Definitions & Models of Rehabilitation :-
   - Definition
   - Medical model
   - Social model
   - Community-based approach / model
4. Epidemiology of Disability :-
   - Meaning
   - Causes / occurrence
   - Patterns of disability
   - Locomotor disability
   - Basic epidemiological aspects
5. Implications of Disability :-
   - Individual
   - Family
   - Social
   - Economic
   - State / community
6. Impairment & Handicap :-
   - Definitions
   - Difference
   - Relationship between impairment,
   - disability & handicap

UNIT - II : DISABILITY PREVENTION & COMMUNITY BASED REHABILITATION

7. Preventive Aspects of Disability :-
   - Meaning
   - Levels of prevention (primary/secondary/tertiary)
   - Role of physiotherapy
8. Organizational Skills to Manage Disability :-
   - Meaning
   - Planning
   - Organization of services
   - Management
   - Coordination
   - Referral & follow-up
9. Community Based Rehabilitation (CBR) :-
   - Definition
   - Principles
   - Objectives
   - Components / approach
   - Community participation
10. WHO Policies about Rural Health Care :-
    - WHO approach
    - Principles
    - Disability services
    - Accessibility
11. Role of Physiotherapy in CBR :-
    - Assessment / screening
    - Exercise programme
    - Functional training
    - ADL training
    - Home rehabilitation
    - Education
    - Prevention of secondary disability
12. Screening for Disabilities :-
    - Meaning / purpose
    - Procedure
    - Identification
    - Early detection
    - Referral & follow-up
13. Prescribing Exercise Programme :-
    - Assessment
    - Exercise selection
    - Dosage / progression
    - Home programme
    - Safety precautions
14. Disability Prevention :-
    - Strategies
    - Secondary complication prevention
    - Early intervention
    - Community awareness / education
15. Strategies to Improve ADL :-
    - Meaning
    - Importance
    - ADL training
    - Environmental modification
    - Assistive devices
    - Patient / caregiver education
16. Rural Rehabilitation :-
    - Concept
    - Services
    - Local resources
    - Agricultural tools
    - Adaptation of agricultural activities
    - Occupational rehabilitation
17. Statutory Provisions & Schemes :-
    - Legal / statutory provisions
    - Government schemes
    - Rehabilitation support / services
    - Benefits / assistance

UNIT - III : NGOs & ORTHOTICS

18. Role of NGOs in Rehabilitation :-
    - Meaning
    - Role
    - Services
    - Community participation
    - Support for persons with disabilities
19. Principles of Orthotics :-
    - Definition
    - Basic principles
    - Functions
    - Biomechanical principles
20. Types of Orthoses :-
    - Classification
    - Upper-extremity
    - Lower-extremity
    - Spinal / trunk orthoses
21. Indications & Contraindications of Orthoses :-
    - Indications
    - Contraindications
    - Precautions
    - Selection
22. Orthotic Assessment / Check-out :-
    - Patient assessment
    - Physical examination
    - Functional assessment
    - Fit / comfort
    - Alignment
    - Pressure areas
    - Functional effectiveness

BPT23

5. IMPAIRMENT & HANDICAP :-

1. Definitions :-

a) Impairment :-

- A loss or abnormality of psychological, physiological or anatomical structure or function.
- It can be temporary or permanent.
- It may involve a single body part or multiple body parts.
- E.g. loss of limb, visual impairment, hearing loss, reduced muscle strength, cognitive deficit etc.

b) Disability :-

- A restriction or lack of ability to perform an activity in the manner or within the range considered normal for a person.
- It is the result of impairment.
- It affects the individual's performance of daily activities (e.g. walking, speaking, self-care, work, education).
- E.g. difficulty in walking, difficulty in hearing, inability to perform daily tasks.

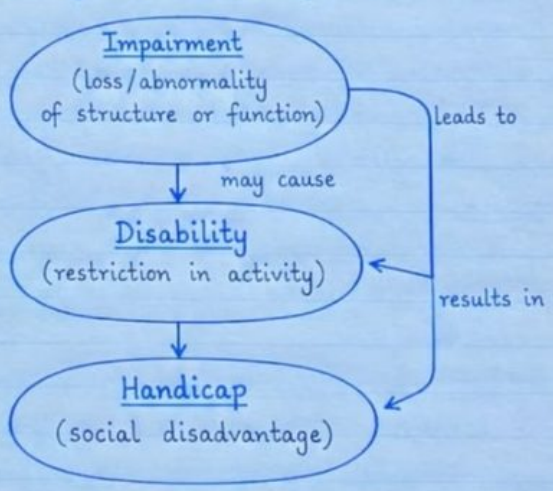

c) Handicap :-

- A disadvantage experienced by an individual due to impairment or disability, which limits or prevents the fulfilment of a normal role in society.
- It is the social consequence of impairment and disability.
- It affects the individual's participation in family, community and society.
- E.g. social isolation, loss of employment, dependence on others, reduced social acceptance.

2. Difference between Impairment, Disability and Handicap :-

Basis	Impairment	Disability	Handicap
Meaning	Loss or abnormality of structure or function.	Restriction or lack of ability to perform an activity.	Disadvantage in fulfilling a normal role in society.
Nature	Physical / mental / sensory / cognitive.	Functional (activity related).	Social (role related).
Cause	Due to disease, injury, congenital condition etc.	Due to impairment.	Due to social and environmental barriers.
Level	Individual (body level).	Individual (activity level).	Social (participation level).
Example	Loss of vision, amputation.	Difficulty in walking, hearing.	Unemployment, social isolation.

3. Relationship between Impairment, Disability and Handicap :-

- Impairment is the starting point.
- It may lead to disability.
- Disability creates handicap when environmental and social factors are added.
- Thus, all handicap is due to impairment, but not all impairment leads to disability and not all disability leads to handicap.

THANK YOU FOR YOUR PURCHASE!

We wish you the very best in your medical and physiotherapy examinations.
