Healthy Children Brighter Future

Small Patients... Big Dreams...

PEDIATRICS

Study Notes

For Healthy Growth & Brighter Tomorrows

KEY AREAS

- Growth & Development
- Neonatology
- Nutrition
- Immunization
- Infectious Diseases
- Respiratory Disorders
- Gastrointestinal Disorders
- Cardiology
- Hematology & Oncology
- Endocrinology
- Neurology
- Adolescent Health

Little Steps... Big Milestones

Every Child Matters

IMPORTANT TOPICS

- Neonatal Resuscitation
- Well Child Care
- Developmental Milestones
- Feeding & Nutrition
- Common Pediatric Infections
- Seizures
- Asthma & Allergies
- Growth Charts
- Pediatric Emergencies

COMMON CONDITIONS

- Fever
- Diarrhea & Dehydration
- Pneumonia
- Asthma
- Urinary Tract Infection
- Malnutrition
- Congenital Anomalies
- Developmental Delay
- Seizure Disorders

HIGH-YIELD BPT STUDY GUIDE & EXAM COMPANION

Paediatrics

Author: Dr. MD Kamran Alam | Instagram: @restore_healthphysio

OFFICIAL DIGITAL STUDY GUIDE VERIFICATION

Format: High-Yield Digital PDF | Standard Price: Rs. 99

Authorized License: Personal Single-User Academic License

STUDY GUIDE DETAILS & CONTENTS:

Comprehensive high-yield notes designed for Bachelor of Physiotherapy (BPT), MBBS, BDS, and allied healthcare students. Covers fundamental anatomy, clinical assessments, pathological conditions, evidence-based physical therapy rehabilitation protocols, and exam-oriented high-yield review.

KEY HIGHLIGHTS:

- Exam-Focused: Concise points curated from leading medical textbooks and clinical references.
- Visual Diagrams: High-yield diagrams and tables for quick revision.
- Mobile & Tablet Optimized: Readable on phones, tablets, iPads, and laptops.
- Official Medicos Minds Release: Verified by Dr. MD Kamran Alam.

Pediatrics

MBBS | BHMS | B.Sc. Nursing | BDS | BPT

Topic - 2

Growth and Development

1. Introduction :

→ Growth refers to quantitative increase in size (height, weight, etc.).
→ Development refers to qualitative changes (mental, motor, social, emotional).
→ Both are interrelated and influenced by genetic, environmental, nutritional and hormonal factors.
→ Regular monitoring helps in early detection of abnormalities and timely intervention.

2. Phases of Development :

A. Prenatal (Fetal) Period :

→ Conception to birth (≈ 40 weeks).
→ Organogenesis (1st trimester).
→ Fetal growth & maturation (2nd & 3rd trimester).

B. Postnatal Period :

→ Neonatal (0 – 28 days).
→ Infancy (1 month – 1 year).
→ Toddler (1 – 3 years).
→ Early childhood (3 – 6 years).
→ Middle childhood (6 – 12 years).
→ Adolescence (12 – 18 years).

3. Factors Affecting Growth & Development :

A. Genetic Factors :

→ Inherited potential.
→ Family height & weight.
→ Chromosomal abnormalities (e.g., Down syndrome).

B. Environmental Factors :

→ Nutrition (breast milk, complementary food).
→ Prenatal care.
→ Socio-economic status.
→ Parenting style & stimulation.
→ Exposure to toxins (lead, alcohol, smoking).

C. Hormonal Factors :

→ Growth hormone, thyroid hormone.
→ Sex hormones (puberty).

D. Medical Factors :

→ Chronic illness, infections.
→ Congenital anomalies.

4. Assessment of Growth :

A. Anthropometric Measurements :

→ Weight (kg) – using calibrated scale.
→ Height / Length (cm) – stadiometer / infantometer.
→ Head circumference (cm) – till 2 years.
→ Mid Upper Arm Circumference (MUAC) – nutritional status.
→ BMI (after 2 years) – weight for height.

B. Growth Charts :

→ WHO growth charts (0 – 5 years).
→ IAP charts (5 – 18 years).
→ Parameters – weight, height, head circumference, BMI.

C. Interpretation :

→ Normal, undernutrition, overnutrition.
→ Short stature, tall stature.

5. Assessment of Development :

A. Methods :

→ Observation (behaviour, motor skills).
→ Developmental screening tools (Denver II, WHO).
→ Age-appropriate milestone chart.

B. Domains :

→ Gross motor (sitting, walking).
→ Fine motor (grasping, writing).
→ Language (babbling, speech).
→ Social & emotional (play, interaction).

C. Red Flags :

→ Delay in milestones.
→ Loss of acquired skills.
→ Behavioural changes.

6. Common Developmental Milestones :

Age Group	Milestones
1 month	Social smile, head control (brief).
6 months	Roll over, reach for objects.
1 year	Sit without support, crawl, babble.
2 years	Walk, simple words, feed self.
3 years	Run, climb, sentences (2-3 words).
5 years	Jump, draw, name colours.
10 years	Better coordination, school readiness.
12 years	Puberty signs (girls: breast bud, boys: testicular enlargement).
15 years	Rapid growth spurt, secondary sexual characteristics.
18 years	Physical & sexual maturity.

7. Management & Follow-up :

→ Ensure adequate nutrition & immunization.
→ Early stimulation & play.
→ Treatment of underlying medical conditions.
→ Counselling of parents.
→ Regular growth & developmental monitoring.
