HIGH-YIELD BPT STUDY GUIDE & EXAM COMPANION

Clinical Psychology & Sociology

Author: Dr. MD Kamran Alam | Instagram: @restore_healthphysio

OFFICIAL DIGITAL STUDY GUIDE VERIFICATION

Format: High-Yield Digital PDF | Standard Price: Rs. 99

Authorized License: Personal Single-User Academic License

STUDY GUIDE DETAILS & CONTENTS:

Comprehensive high-yield notes designed for Bachelor of Physiotherapy (BPT), MBBS, BDS, and allied healthcare students. Covers fundamental anatomy, clinical assessments, pathological conditions, evidence-based physical therapy rehabilitation protocols, and exam-oriented high-yield review.

KEY HIGHLIGHTS:

- Exam-Focused: Concise points curated from leading medical textbooks and clinical references.
- Visual Diagrams: High-yield diagrams and tables for quick revision.
- Mobile & Tablet Optimized: Readable on phones, tablets, iPads, and laptops.
- Official Medicos Minds Release: Verified by Dr. MD Kamran Alam.

INDEX

1. Theories of Psychology
2. Classification Systems in Psychopathology
3. Early Diagnostic Classification Systems
4. ICD and DSM
5. Approaches to Psychopathology:
   - Biological
   - Psychodynamic
   - Behavioral
   - Cognitive
   - Socio-Cultural
6. Introduction – Meaning, Definition and Scope of Sociology
7. Its Relation to Social Psychology
8. Socialization – Meaning, Process and Agencies
9. Primary, Secondary and Anticipatory Socialization
10. Social Groups – In Hospitals
11. Socialization in the Rehabilitation of Patients
12. Meaning, Definition, Features and Influence of Formal Groups on Health and Sickness
13. Meaning, Definition, Features and Influence of Informal Groups on Health and Sickness
14. Group Dynamics in Healthcare Settings
15. Role of Group Support in Recovery
16. Anxiety Disorders: Approaches and Etiology
17. Generalized Anxiety Disorder
18. Panic Disorder
19. Phobia
20. Obsessive-Compulsive Disorder
21. Post-Traumatic Stress Disorder
22. Somatoform Disorders: Approaches and Etiology
23. Somatization Disorder
24. Hypochondriasis
25. Pain Disorder
26. Conversion Disorder
27. Family – Meaning and Definition
28. Types of Family
29. Features and Functions of Family
30. Social Factors in Health and Disease Situations: Meaning of Social Factors
31. Role of Social Factors in Health and Disease Situations
22. Outcome Measures to Assess Psychological Status of Patient
33. Psychotic Disorders: Approaches and Etiology
34. Schizophrenia
35. Paranoid Disorders
36. Mood Disorders
37. Community – Rural Community: Meaning and Features
38. Health Hazards to Ruralities
39. Urban Community: Meaning and Features
40. Health Hazards to Urbanities
41. Social Worker – Meaning and Role of Medical Social Worker
42. Social Change – Meaning and Factors
43. Human Adaptation and Social Change
44. Social Change and Stress
45. Social Change and Health Programmes

TOPIC 1

THEORIES OF PSYCHOLOGY

1. INTRODUCTION

Psychology is the scientific study of mind and behaviour. Theories of psychology are organized systems of ideas that attempt to explain, predict and influence human behaviour and mental processes.

DEFINITION

A theory in psychology is a logically structured set of principles that explains a set of observations or behaviours and can be tested.

2. NATURE OF PSYCHOLOGICAL THEORIES

- **Tentative:** Theories are open to revision with new evidence.
- **Empirical:** Based on observation and scientific research.
- **Explanatory:** They explain why behaviour occurs.
- **Predictive:** They help in predicting future behaviour.
- **Useful in application:** Guide in assessment, therapy and research.

3. MAJOR THEORETICAL PERSPECTIVES IN PSYCHOLOGY

THEORY	MAIN FOCUS	KEY PROPOSITIONS
1. PSYCHOANALYTIC THEORY	• Unconscious mind • Early childhood experiences • Internal conflicts	• Behaviour is driven by unconscious motives and conflicts. • Personality has three components: Id, Ego and Superego.
2. BEHAVIORIST THEORY	• Observable behaviour • Learning through environment • Stimulus-response	• Behaviour is learned. • Reinforcement and punishment shape behaviour.
3. COGNITIVE THEORY	• Mental processes • Thinking, memory, perception • Information processing	• Behaviour is influenced by how people think, process and interpret information.
4. HUMANISTIC THEORY	• Human potential • Self-concept and growth • Free will	• People are basically good and have the potential for self-actualization. • Emphasizes on personal growth.
5. BIOLOGICAL THEORY	• Biological processes • Brain, genes, hormones • Evolution	• Behaviour is influenced by biological factors, brain structure and neurochemistry.
6. SOCIO-CULTURAL THEORY	• Influence of culture and society • Social learning • Environment	• Behaviour is shaped by social and cultural factors and interaction with others.

4. LEVELS OF ANALYSIS

- **Biological Level** : Focuses on brain, genes, neurochemistry.
- **Psychological Level** : Focuses on thoughts, emotions, behaviours.
- **Social Level** : Focuses on social interactions, culture, environment.
- **Cultural Level** : Focuses on beliefs, values, customs and traditions.

5. FUNCTIONS OF THEORIES

- ✓ Organize and summarize knowledge.
- ✓ Explain behaviour and mental processes.
- ✓ Predict future behaviour.
- ✓ Guide research and clinical practice.
- ✓ Help in understanding and solving psychological problems.

6. IMPORTANCE OF THEORIES

- ★ Provide a framework for understanding human behaviour.
- ★ Help in developing effective assessment and therapeutic techniques.
- ★ Useful in education, clinical practice, counselling and research.
- ★ Promote scientific thinking and evidence-based practice.

> " The goal of theories is not to be right, but to be useful in understanding human behaviour. "

THANK YOU FOR YOUR PURCHASE!

We wish you the very best in your medical and physiotherapy examinations.
